EDUCATION

University of Alberta

Bachelor of Computing Science, Honors

Edmonton, AB

January 2023 – December 2026

WORK EXPERIENCE

Teaching Assistant

Department of Mathematical and Statistical Sciences, University of Alberta

September 2024 – Present

Edmonton, AB

- Aid the lead teacher by answering students' questions, and assisting students with assignments.
- Grading students' works and give feedbacks

Cashier

Van Loc Vietnamese Submarines Shop

April 2023 – Present

Edmonton, AB

- Collaborate and communicate with other team members to tackle all the tasks, resulting in an improvement of 80% in performance
- Provide excellent customer service while executing quick transactions with accuracy in a stressful and fast-paced environment
- Maintain a sanitary workplace abiding to Canada's Food and Drugs Act and Regulations

PROJECTS

Coiny | *Javascript, React.js, Node.js, Express.js, Firebase, OpenAI Vision Api, Serpapi*

November 2024

- Won **first place** in DevelopEd 3.0 hackathon in the Wildcard Category, hosted by Dev Edmonton Society
- Developed an **AI-powered app** that identifies coins from photos, provides details, connects you to the best prices online, and helps you effortlessly manage your collection
- Integrated Firebase Firestore to allow user save coin data to their collections, and Firebase Authentication for creating personal accounts

Sparrer | *Typescript, Javascript, React Native, Expo, NodeJs, Firebase, TailwindCSS*

June 2024 – October 2024

- Building a **full-stack cross-platform app** (iOS, Android, Web) for boxers to find sparring partners nearby, leveraging React Native and Expo for seamless deployment
- Developed robust matching algorithms with Firebase, including geo-queries for location-based user pairing and real-time chat with media sharing capabilities
- Integrated Firebase for efficient backend management, enabling secure, real-time data synchronization across platforms

Nx-C | *Python, Tkinter, Tensorflow, NumPy, Matplotlib*

Sep 2023 – July 2024

- Developed a no-code application for users to design, train, and test custom CNNs, leveraging TensorFlow for deep learning
- Built an interactive Tkinter-based GUI, enabling users with minimal coding experience to configure CNN layers, optimize hyperparameters, and visualize training metrics

More of my personal projects can be found on **my portfolio website** or **my Github**

TECHNICAL SKILLS

Languages: Python, Typescript, Javascript, C/C++, C, Java, HTML, CSS, R

Frameworks: React Native, React, Node.js, TailwindCSS, Expo

Developer Tools: Git, Github, Firebase, VS Code, Visual Studio, Android Studio, Gemini, Google Cloud

Libraries: tensorflow, NumPy, Matplotlib

PROGRAMMING CERTIFICATES

Backend Development and APIs Certificate - FreeCodeCamp

C++ Certificate - F8 Education
